

OnSpeX™ Test

Before *GET GREEN*® System

GET GREEN® System Applied

- 1) Increase in Temperature Rise of 5% means a higher heat efficiency which generates a fuel savings.
- 2) Carbon Monoxide decrease of 100% means an increase in combustion efficiency.
- 3) Combustion Efficiency increase of 1.42% means a cleaner, more efficient burning of the fuel.
- 4) A 30.5% increase of the Steady State Condensate means an increase of airflow across the heat exchanger which generates a fuel savings.
